

Career at Nearsoft in Warmia, Poland

Java and/or C++ Software Engineer

We are an international company providing latest state-of-the-art solutions for voice communication for Air Traffic Management around the world.

Our software integrates traditional TDM telecommunication protocols, radio communication and Internet protocols, provides appealing configurable user interface, offers sophisticated digital voice processing and runs on Linux devices and servers. We are working in a Linux environment with tools like Eclipse, git, Jenkins, JIRA and are living the culture of agile software development with Scrum and continuous integration. We are modelling our software with UML and implementing it in Java and C++.

We are a team of engineers spread across multiple countries and are now establishing our main R&D Center in the beautiful Koszary Funka in Olsztyn, Poland, providing proximity to forests and lakes combined with modern city infrastructure.

If you are an experienced Java and/or C++ software engineer, have sound computer science education background, communicate fluently in English and seek an international company, challenges of complex, distributed systems, a creative and self-motivated team in a friendly, supportive environment, please send your complete application in English to career@nearsoft.com.pl.

Become a part of our dynamic, international team in a beautiful and relaxing environment in the heart of Warmia!
